MedOne Education

Thieme's medical learning platform with fully illustrated downloadable medical textbooks

MedOne. Empower Yourself.

Thieme

MedOne Education – Direct access to Thie

MedOne's powerful medical learning platform is perfect for medical students and experienced specialists alike. By combining expert information with stunning visuals, the site serves as both a learning and teaching tool. MedOne makes it easy to research at school, home, work, or on the go.

The Thieme E-Book Library is now a part of MedOne Education, providing users with access to Thieme's collection of medical textbooks. Covering every course in the medical school curriculum, MedOne Education is an exceptional resource for learning, review and research in medicine and the life sciences. Users have access to illustrated full-color medical textbooks covering anatomy, basic sciences, clinical sciences and radiology. Additionally, all titles can be download to the MedOne app to read offline.

To view the list of included titles, please visit: www.thieme-connect.com

For the medical student
▶ Instant access to medical textbooks
▶ Ideal for quick reference or in-depth review
▶ Perfect study companion throughout medical school
▶ Covers the clinical and scientific topics you need to succeed

For the instructor
▶ Require titles with no cost to students
▶ Easily download images for lectures
▶ Create custom playlists for every course
▶ Add notes for future reference

For the institution
▶ Invite students to learn at anytime in any place
▶ Improve efficient teaching
▶ Appeal to prospective students and faculty
▶ Establish a system for constant learning

■ E-Books

It's never been easier to access Thieme's extensive collection of medical textbooks. Get the benefits of print books plus electronic features, where it's easy to expand images, watch videos, and write notes. As your users read, they can customize their experience with versatile viewing modes or leave the screen behind when they download and print chapters. New e-books are frequently added so they always have new content on hand.

■ MedOne app

The MedOne app lets users download and read offline e-books, journal articles, and watch videos on the go. It is designed to make browsing, accessing, and reading MedOne content simple and easy. The app is freely available for Android and iOS devices to MedOne users at institutions with access to MedOne content.

Media

When words aren't enough, the images and videos from all of our textbooks on MedOne are always at your users' disposal. They can quickly find and compare images in their browser or download images directly to a PDF or PowerPoint file to enhance any presentation. Legends and links allow them to refer back to the source, so they can include the appropriate citations.

MedOne@Home

Users are no longer confined to the building with MedOne@Home offsite access. This allows them to find information anywhere, anytime. They can set up an individual username within your department's license, so all they need is internet access to view content, create notes, and highlight text. Plus, their account auto-syncs to remember recently viewed content and bookmarks.

Search

There's a lot of content on MedOne Education. But don't worry: users don't have to sift through it to find the information they need. MedOne's intuitive search engine not only auto-fills terms but also filters the results, so users can instantly find what they want. Plus, it's easy to narrow searches with filters and options to hide irrelevant results.

MedOne Playlists

With the playlist feature, users can create customized content sets and collections. Using MedOne's resources, external links, or personal files, users can put together individual collections of information. Playlists can be kept private, shared with others from your institution, or shared with all MedOne users across institutions.
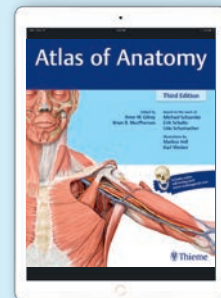

Responsive Design

Automatic screen adaptation lets your users take MedOne along as an anyplace platform. No matter what features they need or what device they have, they can use web-enabled access to get the most out of the platform. Researching is simple when users can effortlessly transition between computers, tablets, and phones.
